## **HEADSTONES LAID DOWN FOR SAFETY SINCE THE LAST MEETING**

### **REPORT ON ISSUES IN FOREST ROW CEMETERY**

There are no issues to be reported.

### **REPORT ON COVID-19 CASES**

Since the outbreak of Covid-19 in the UK we have had 7 request for burials in Forest Row Cemetery, out of the seven requests 2 were from the same household in Forest Row, the other five are from different households with most being in nursing homes on the outskirts of the village. To date four burials have taken place with the remaining three are pending.

When a funeral has been arranged the social distancing rules still apply with a maximum of 8 family members and the minister at the graveside. The funeral directors staff move to a separate area of the cemetery whilst the graveside service takes place, they then return once the service is over to lower the deceased into the ground.

In the case of a second interment into a previously used grave that is Covid-19 related, I have been advised that it is perfectly safe to re-open the grave after a period of 24 hours. This is due to the fact that the previous interment has a substantial layer of soil on top which means the first interment will not be disturbed during subsequent interments.
